## **Rescission of Technical Guidance #TG97-003**

**Date:** July 7, 2003

**Rule:** 320 as adopted 7/13/88

---

The Technical Guidance document TG97-003 is hereby rescinded.

**Discussion:** TG97-003 was created in 1997 by the Rules Clarification Committee to interpret and amplify Section 310 in the 1988 version of Rule 320. TG97-003 described that the carbon monoxide limitations do not apply to fuel burning equipment. The current version of Rule 320 (adopted 7/2/03) supersedes the 1988 version. New rules 322 and 323 were adopted at the same time and address all emission limitations for fuel burning equipment, therefore eliminates the need for TG97-003.
